### About This Game

IMPORTANT, READ CAREFULLY!

### About the genre of this game

This game is visual novel. You cannot directly control the 3D model of the protagonist, you will advance the game plot using textual links. You can read more about the visual novels using the link below:

[https://en.wikipedia.org/wiki/Visual\\_novel](https://en.wikipedia.org/wiki/Visual_novel)

### DESCRIPTION

The Barbarian and the Subterranean Caves is an adventure visual novel about the heroic feats of the intrepid warrior Ragnar.

Now you can become the famed adventurer Ragnar and bravely seek out all-new original adventures in this exciting game.

Delve into the mysteries of the caves and discover what lies in waiting below. Ready your sword: you will investigate sprawling, far-reaching webs of intrigues and unmask the cunning evildoer who stands in your way.

Can you tell a friend from a foe; who wants to manipulate you and who really needs your help?

Ragnar has six qualities you can choose from; each one influences the plot in its own way. But you must strategize well because you may only choose three.

---

Conquer all those who oppose you, overcome difficulties, let your conscience guide you through tough choices, and don't let lies ensnare you in a sticky web.

Take control over your hero's destiny to unlock the multiple endings and get the richest rewards.

Discover the truth in the darkest depths of the subterranean caves...

## **MAIN FEATURES**

- Non-linear, choose-your-own-adventure plot
- Unique endings to find
- More than 300 detailed illustrations
- Mosaic plot that completely opens by only completing a few storylines
- Cross-platform compatibility (Windows, Mac, Linux)
- Steam trading cards and badges
- Achievements
- Steam Cloud support

English,Russian

The girl immediately ordered servants to escort the Lemurian to the guest room, serve dinner, and meet all his needs in general.

He looked into her large, bright eyes so full of passion, then on her tender half-opened lips, and instead of answering, he tightly wrapped his arm around her waist and ardently kissed her.

Once Ragnar arrived at the market, he began to think of whom to offer his treasure. At that moment his observant gaze fell upon a counter full of trinkets for women.

---

the barbarian and the subterranean caves. the barbarian and the subterranean caves gameplay

This is the best game I have ever played. The stunning graphics, the jaw-dropping story... All of it comes together to make one of the worst things I've ever seen, in a good way.. *The Barbarian and the Subterranean Caves* is a choose your own adventure visual novel with adult NSFW content by NLB project. It features an adventurer Ragnar who wanders into a city in the desert to look for work as a mercenary, and decides to take up on a bounty offer to hunt down a beast hiding in an underground cave that has been terrorizing the city folk who go to the cave to fetch water.

As a choose your own adventure visual novel, the protagonist starts with three qualities the player can choose which will slightly alter the storyline, and there are plenty of decision points, plot branches and endings. There are some unexpected surprises at certain points in the story and a few comical situations with a funny ending scene. I like the dinosaur more than the noblewoman or the secret girl, can we have an ending with the dinosaur? xD

Among the cons, some parts of the story are repeated and there are a few achievements such as Magic Amulet and Shine of a coin which involve giving a similar response to the same character in a different plot branch in the story. In addition, the short gameplay time where it takes around a couple of hours to play and read through all the text in this game, get all achievements and reach the secret romance ending that was added in an earlier update means it might be more worthwhile to wait until the game is discounted to a couple of dollars or less to match the gameplay time.

Overall, *The Barbarian and the Subterranean Caves* is a short choose your own adventure visual novel without any sound effects or animation. The game relies on illustrations and text to tell a story that has an interesting storyline, comical illustrations and easy achievements. There are published Steam community guides to help players in reaching the parts that are harder to find and get all achievements in the game.. *Dungeon crawler treasure searching game*; though it may look as a 3d first person or third person roaming game - warning - it is not - its a visual story where you proceed by making choices with the help of textual links. I did not like the graphics in a game - 3d could have been made far better; or the game could be drawn by hand and get some animation looks (just like daedalic does in its visual stories games), however, this one proudly carries 18+ age restriction and i can say it boasts this age restriction policy though game description modestly says "its just to avoid the problems" at the same time it promices "quite a bit of erotic scenes" i really don't think it will help either "to avoid the problems" or to sell more copies, but i can recommend the game to visual stories fans.. Very cool game.. The subterranean cavern is a metaphor. If you play you will discover it's meaning. A charming tale set in a classic fantasy universe. You must play it to uncover the wealth hidden in the gem of a game.  
+GORGEOUS GRAPHICS
